

Advancing Nurse-Led Research

Watch a three-part podcast series providing valuable insights and guidance for nurses interested in research.

This three-part Nurse-Led Research Podcast series aims to inspire and empower nurses at all educational levels. It provides a foundational introduction to research and practical guidance on how to get involved, making research accessible and actionable for all.

Series Highlights:

- Find actionable tips on how to get started with research, from identifying topics to navigating the research process.
- Learn about research anytime, anywhere.
- Explore the importance of research in improving patient care, driving innovation, and advancing the nursing profession.
- Listen to success stories and advice from nurse researchers.
- Gain the skills and confidence to engage in research, opening doors to leadership roles and opportunities in academia or healthcare organizations.

Opportunities for Research:

- Early career investigator awards
- Data bootcamps
- Precision medicine platform
- Research using hospital data
- Research using national data

I'm a nurse, Am I a researcher too?

SESSION 1

Leanne Lefler, PhD, ACNS-BC, APRN, FAHA, FAAN
Loewenberg College of Nursing – The University of Memphis

Mary Ann Leavitt, PhD, CCRN, CHFNP
Christine E. Lynn College of Nursing –
Florida Atlantic University

*Scholarly Inquiry & Quality
Improvement Research*

SESSION 2

Tiffany Sheehan, PhD, RN, SCRN, ASC-BC, FAHA
American Heart Association Stroke System of Care
Advisory Group

*Guidelines for formal Model
Sharing & Abstract
Presentation*

SESSION 3

Nurses play a pivotal role in advancing implementation science, offering valuable insights into the impact of guideline-directed care on patients and their families. By leveraging data from the Get With The Guidelines® program, nurses across various roles can make significant contributions to this critical area of research.

Opportunities for Model Share:

- Quality Forums
- Scientific Sessions
- International Stroke Conference
